

iVENT ROTO

Unique turbine vertical system. The wind powered turbine creates negative pressure in ventilation system which maximizing air draft. Wind creates turbine movement of the head, which maximize air draft in ventilation system. Protects against back air flow. System connection element, always placed perpendicular to the roof slope. Provides easy click connection with iFlex pipe.

Product code:	RLK-6-__-__	RLP-6-__-__
Diameter:	6"	6"
Height:	17"	17"
Weight:	5 lbs	5 lbs
Shape:	round	oblong
Regulation:	5 - 45 degrees	
Material:	high quality polypropylene, UV resistant	
Bearing:	double ball bearing, encased in the high quality oil	
Sealant (flat base PI)	Butyl tape is sealant able to form an instant and permanent bond to any clean and dry surface, but it remains flexible even after withstanding fluctuating conditions. This sealant is also extremely weather-resistant because it self-heals, which means bolts and fasteners won't hinder its sealing abilities. That makes it particularly valuable for roofing applications as installation, and even reinstallation down the line, will not compromise its durability.	
Set contains:	iVENT roto vertical vent, base, exhaust pipe, screws, installation instruction
